## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-34 and 38-43, drawn to an analyzer, classified in class 422, subclass 63.
  - II. Claims 35-37, drawn to a method of making a test element, classified in class 29, subclass 17.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the analyzer and the method of making of the test element are not disclosed as capable of being used together; they have different modes of operation and different functions.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to attorney Sujatha Subramaniam on 01/29/07 to request an oral election to the above restriction requirement, but did not result in an election being made.
